SPP HPE Custom Image vibsdepot mapping for Pre-Gen9

HPE Custom Image to HPE SPP Mapping
Use the following links to view the table that maps the HPE Custom Images for the OS release to the vibsdepot directory and the supported HPE SPP release for Pre-Gen9 servers. The vibsdepot directory contains all the drivers and software added to the referenced HPE Custom Image, or the drivers and software for a hot-fix for the referenced HPE Custom Image as described in the footnotes. The HPE SPP contains the drivers included in the HPE Custom Image and the matching FW components.

Use the SPP link in the table to view detailed information on where to obtain the appropriate firmware, drivers and software for the supported OS releases and server generations for the SPP release.
